*Please contact our financial institution for current rates and annual percentage yields. At our discretion, the interest rate and the annual percentage yield may change on this account at any time. We use the daily balance method to calculate the interest on your account. The daily balance method applies a daily periodic rate to the balance in the account each day. Interest begins to accrue on the day you deposit noncash items (for example, checks). You will earn interest for every day during the period that your account equals or exceeds the minimum daily balance requirement. Falling below the minimum balance requirement will affect the earnings because of the \$6.50 monthly service charge.
